

Passleader 1Y0-300 Exam Dumps Contain Almost 100% Correct Answers Ensure Your Pass (21-40)

QUESTION 21A Citrix Engineer needs to finish the Citrix StoreFront deployment for CCH and configure DNS to support email-based auto discovery. Which type of DNS record should the engineer create? A. MXB. SRVC. CERTD. CNAMEAnswer: B QUESTION 22A Citrix Engineer must use Provisioning Services to provision 50 pooled desktops. What must the engineer do to prevent users who are assigned pooled desktops from being impacted by database connection issues? A. Configure Offline Database Support on the Provisioning Services servers.B. Set the value of the High Availability registry key on the master image to 1.C. Ensure the write cache is stored locally on the hard disk of pooled desktops.D. Create a script to automatically synchronize the Provisioning Services database to all Provisioning Services servers. Answer: A QUESTION 23Scenario: A Citrix Engineer needs to ensure that the desktop for the HR department containing confidential information is only accessible when endpoint analysis scans are successful on the endpoint. The engineer also needs to configure the Smart Access filter on the Delivery Group. The engineer needs to use the _____ for the farm name and _____ as the filter for smart access. (Choose the correct option to complete the sentence.) A. NetScaler NSIP; Traffic PolicyB. NetScaler MIP; Clientless Access PolicyC. NetScaler Hostname; Authentication PolicyD. NetScaler Virtual Hostname; Session Policy Answer: D QUESTION 24Which policy type should a Citrix Engineer configure when configuring access to Citrix StoreFront through NetScaler? A. TrafficB. SessionC. AuthenticationD. Pre-Authentication Answer: B QUESTION 25Which two options would a Citrix Engineer select when using the XenDesktop Setup Wizard to deploy streamed desktop OS machines? (Choose two.) A. Delivery GroupB. Device CollectionC. vDisk in Private ModeD. vDisk in Standard Mode Answer: BD QUESTION 26A Citrix Engineer needs to use high availability for a Citrix StoreFront deployment. Using high availability will enable the engineer to use the _____ and _____ features. (Choose the two correct options to complete the sentence.) A. CertificateIdB. UserSiteMappingC. EquivalentSiteSetD. EnableMultiDesktop Answer: BC QUESTION 27Which three optimizations are made for a virtual machine during the installation of the Virtual Delivery Agent? (Choose three.) A. Offline files are disabled.B. The Event log size is reduced.C. Background defragmentation is disabled.D. The Windows Firewall service is set to 'Manual'.E. The pagefile size is set to 'Automatically managed by Windows'. Answer: ABC QUESTION 28Scenario: A Citrix Engineer needs to implement HDX Flash Redirection for virtual desktops in a XenDesktop environment. HDX Flash policies are configured to use both client-side rendering and client-side content fetching. The engineer tests the Flash redirection functionality by viewing an online Flash video on the virtual desktop and checking the results in Citrix Director. Citrix Director displays that client-side rendering is being used with server-side content fetching. What does the engineer need to do to make sure both rendering and content fetching are completed on the client? A. Install Flash on the client device.B. Configure the Flash latency threshold to 50 ms.C. Enable direct Internet access for the client device.D. Disable server-side content fetching on the client device. Answer: C QUESTION 29Scenario: A Citrix Engineer is required to configure remote access through NetScaler to a Citrix StoreFront deployment for mobile device users. The engineer needs to ensure that the version of Citrix Receiver running on the endpoint is compatible with the native Citrix StoreFront services interface. The engineer should use the REQ.HTTP.HEADER User-Agent _____ CitrixReceiver && REQ.HTTP.HEADER X-Citrix-Gateway _____ session policy expression to ensure that the correct session profile is used. (Choose the correct option to complete the sentence.) A. CONTAINS; EXISTS B. CONTAINS; NOTEXISTS C. NOTCONTAINS; EXISTS D. NOTCONTAINS; NOTEXISTS Answer: A QUESTION 30Using Citrix Studio, which two pieces of information are required to connect a Delivery Controller to a hosting infrastructure? (Choose two.) A. Hypervisor addressB. Hypervisor credentialsC. Hypervisor management VLAN D. Hypervisor high-availability server address Answer: AB

<http://www.passleader.com/1y0-300.html>] QUESTION 31A Citrix Engineer must use the XenDesktop Setup Wizard to provision 50 desktops. Which machine catalog type should the engineer select to implement hosted shared desktops? A. Physical machine catalogB. Remote PC Access machine catalogC. Windows Server Operating System machine catalogD. Windows Desktop Operating System machine catalog Answer: C QUESTION 32Scenario: Two servers need to be added to a XenServer resource pool. The Procurement department is only able to place an order for the newer generation servers. What are three necessary considerations when adding the hosts to the current pool? (Choose three.) A. The servers need to have the same amount of RAM.B. CPUs need

to be from the same vendor as the existing CPUs.C. Servers need to be from the same vendor as the existing servers.D. The features of the older CPU must be a subset of the newer CPU.E. The CPU of the new server must have Intel or AMD Migration support. Answer: B

QUESTION 33Scenario: A Citrix Engineer has installed Citrix Director in the Infrastructure domain according to the design document. The Help Desk staff are complaining that they are unable to discover users in the EMEA domain. Which IIS setting should the engineer configure to solve this issue? A. Connector.ActiveDirectory.UseSSL = 1B. Service.Connector.WinRM.Identity = ServiceC. Service.AutoDiscoveryAddresses = SiteAController,SiteBControllerD. Connector.ActiveDirectory.Domains = (user),(server),ENDUSERDOMAIN Answer: D

QUESTION 34What are the minimum required NTFS permissions for a Roaming Profile parent folder that is required to be configured by a Citrix Engineer? A. Creator Owner - Full Control, Subfolders and Files Only Administrator ? None Security group of users needing to put data on share - List Folder/Read Data, Create Folders/Append Data - This Folder Only Everyone - No permissionsLocal System - Full Control, This Folder, Subfolders and FilesB. Creator Owner - Full Control, Subfolders and Files Only Administrator - Full Control Security group of users needing to put data on share - List Folder/Read Data, Create Folders/Append Data - This Folder Only Everyone - Full ControlLocal System - Full Control, This Folder, Subfolders and FilesC. Creator Owner - Full Control, Subfolders and Files Only Administrator - Full Control Security group of users needing to put data on share - List Folder/Read Data, Create Folders/Append Data - This Folder Only Everyone - No permissionsLocal System - Full Control, This Folder, Subfolders and FilesD. Creator Owner - No permissions Administrator - Full Control Security group of users needing to put data on share - List Folder/Read Data, Create Folders/Append Data - This Folder Only Everyone - No permissions Local System - Full Control, This Folder, Subfolders and Files Answer: A

QUESTION 35Scenario: A Citrix Engineer created dedicated desktops for managers, doctors, and HR. Doctors accessing their desktops have the ability to copy and paste between their local PC and the dedicated desktop, even though company policy dictates that only managers should be granted this ability. The engineer needs to implement a solution that prevents the doctors from using the clipboard, while also enabling the HR users to print. The engineer inspects the configured policies and observes a Management policy filtered on the Management Users Active Directory group, a Doctors policy filtered on the Doctors Active Directory group, and an HR policy filtered on the HR Active Directory group. The policies and settings are as follows:Policy A - Management - Client Clipboard redirection: AllowedPolicy B - Doctors - Client Clipboard redirection: AllowedPolicy C - HR - No settings configuredPolicy D - Unfiltered - Client Clipboard redirection: Prohibited. Client Printer Redirection: Allowed.Auto-create all client printers: AllowedHow should the engineer prioritize the policies? (The policies below are listed in order of priority from highest (left) to lowest (right).) A. Policy A, Policy B, Policy D, Policy CB. Policy A, Policy D, Policy C, Policy BC. Policy C, Policy A, Policy B, Policy DD. Policy B, Policy C, Policy A, Policy D Answer: B

QUESTION 36How should a Citrix Engineer use Citrix Director to view current and historical logon times for an individual client? A. From the farm latency under the Trends pageB. From the Activity Manager panel under the Help Desk page C. From the Logon Duration panel under the User Details pageD. From the Activity Manager panel under the Machine Details page Answer: C

QUESTION 37Which two steps should a Citrix Engineer perform to confirm that SSL is configured correctly on the IIS server for Citrix Director? (Choose two.) A. Set UI.EnableSslCheck to true in IIS under application settings.B. Set UI.EnableSslCheck to false in IIS under application settings.C. Verify that the SSL certificate is bound to the application pool in the IIS management console.D. Verify that the SSL certificate is bound to the Citrix Director Site in the IIS management console. Answer: AD

QUESTION 38A Citrix Engineer needs to configure endpoint analysis scans within a session policy and needs to avoid running the scans on unsupported mobile devices. What should the policy expression contain? A. Client Source IP addressB. User-Agent HTTP headerC. Client Source MAC addressD. Server Destination IP address Answer: B

QUESTION 39Which two commands could a Citrix Engineer use to troubleshoot licensing related issues when deploying a Delivery Controller? (Choose two.) A. Imdiag -cB. Imdown -cC. Imhostid -etherD. Imhostid -hostname Answer: AD

QUESTION 40A Citrix Engineer must implement the Universal Print Server to streamline printing. What are two steps the engineer must perform to implement the Universal Print Server? (Choose two.) A. Enable the Universal Print Server in a policy.B. Enable the Auto-create all client printers option in a policy.C. Install the Universal Print Server software on print servers in the environment.D. Install the Print and Document Services Role on all server machines in the environment. Answer: AC
